Sergio Xalambrí

Full-Stack Web Developer · Lima, Peru (UTC−5) · Remote

hello@sergiodxa.com · sergiodxa.com · github.com/sergiodxa · linkedin.com/in/sergiodxa

Full-stack web developer since 2013, building with TypeScript, React, Remix and React Router. I build the web app at Daffy and maintain open-source libraries with 3M+ npm downloads a month combined, used across the Remix and React Router ecosystem. I care about the Web Platform, progressive enhancement and APIs other developers find obvious.

Experience

Web Developer, Daffy (formerly Silverback Ventures) 2021 – Present

- Build the web app of Daffy, a donor-advised fund that grew into a top-10 DAF in the U.S. with more than 16,000 accounts.
- Migrated the app from Next.js to Remix in nine months with no feature freeze, running both in one server with shared sessions while routes moved over one at a time.
- Designed a Remix backend-for-frontend over the Rails API, with a schema-validated API client, generated PDF donation reports and Open Graph images.
- Extracted the patterns into Remix Utils, Remix Auth strategies and remix-i18next, now open-source libraries other teams build on.

Frontend Lead, Able 2018 – 2021

- Led the frontend architecture of an internal product being prepared for public launch, building with React against a Rails backend.
- Wrote the initial frontend curriculum for Codeable, Able's full-stack bootcamp, and taught its React course.

Support Engineer, ZEIT (now Vercel) 2017 – 2018

- Helped customers deploy to Now and adopt Next.js, building sample apps for their use cases.
- Worked on the documentation of ZEIT's API, so customers could learn the platform without a support ticket.

Frontend Developer, Platzi 2015 – 2017

- Built the live classes system, discussions, the video player and React server rendering on the Django platform of a YC-backed online school.
- Open-sourced Pulse Editor, Platzi's Markdown editor, and Pulse, its Electron desktop app; taught web development courses.

Open source

- **Remix Utils**: Utilities for routes, responses, server-sent events, CSRF and more. (1.6M downloads a month, 2.3k stars)
- **Remix Auth**: Authentication for Remix and React Router apps, with dozens of strategies. (650k downloads a month, 2.2k stars)
- **remix-i18next**: Translations for Remix and React Router apps with i18next. (700k downloads a month)
- **The @sdxc packages**: 130+ packages and a CLI for full-stack apps on Web Platform APIs and Cloudflare Workers.
- **Contributor**: Remix, React Router, Next.js, SWR and micro.

Talks and writing

- The Remix Way, Remix Jam 2026, Toronto 2026
- Remixing How We Give, Remix Conf Europe 2022 2022
- Hundreds of articles and tutorials, sergiodxa.com 2013 – Present

Skills

Languages and frameworks: TypeScript, JavaScript, React, Remix, React Router, Next.js, Node.js, Bun
Platform: Cloudflare Workers, D1, KV, Durable Objects, Express, Rails APIs, SQL
Practices: Authentication (OAuth 2.0, OpenID Connect, passkeys), testing with Vitest, accessibility, progressive enhancement, library and API design, technical writing

Education · Languages

Self-taught: Web development courses at Mejorando.la, now Platzi (2013 – 2015).
Languages: Spanish (native), English (fluent)
